

The background is a dark purple gradient with a subtle grid of small white dots. A thin, dark purple line runs vertically on the left side, with a small white dot near the middle. A large, dark purple, curved shape is at the bottom, resembling a horizon or a stylized wave.

Problem Statement

Limited Practice

Students often know the theory but lack realistic technical interview practice.

Generic Feedback

General-purpose AI can simulate questions, but feedback is not structured for interview preparation.

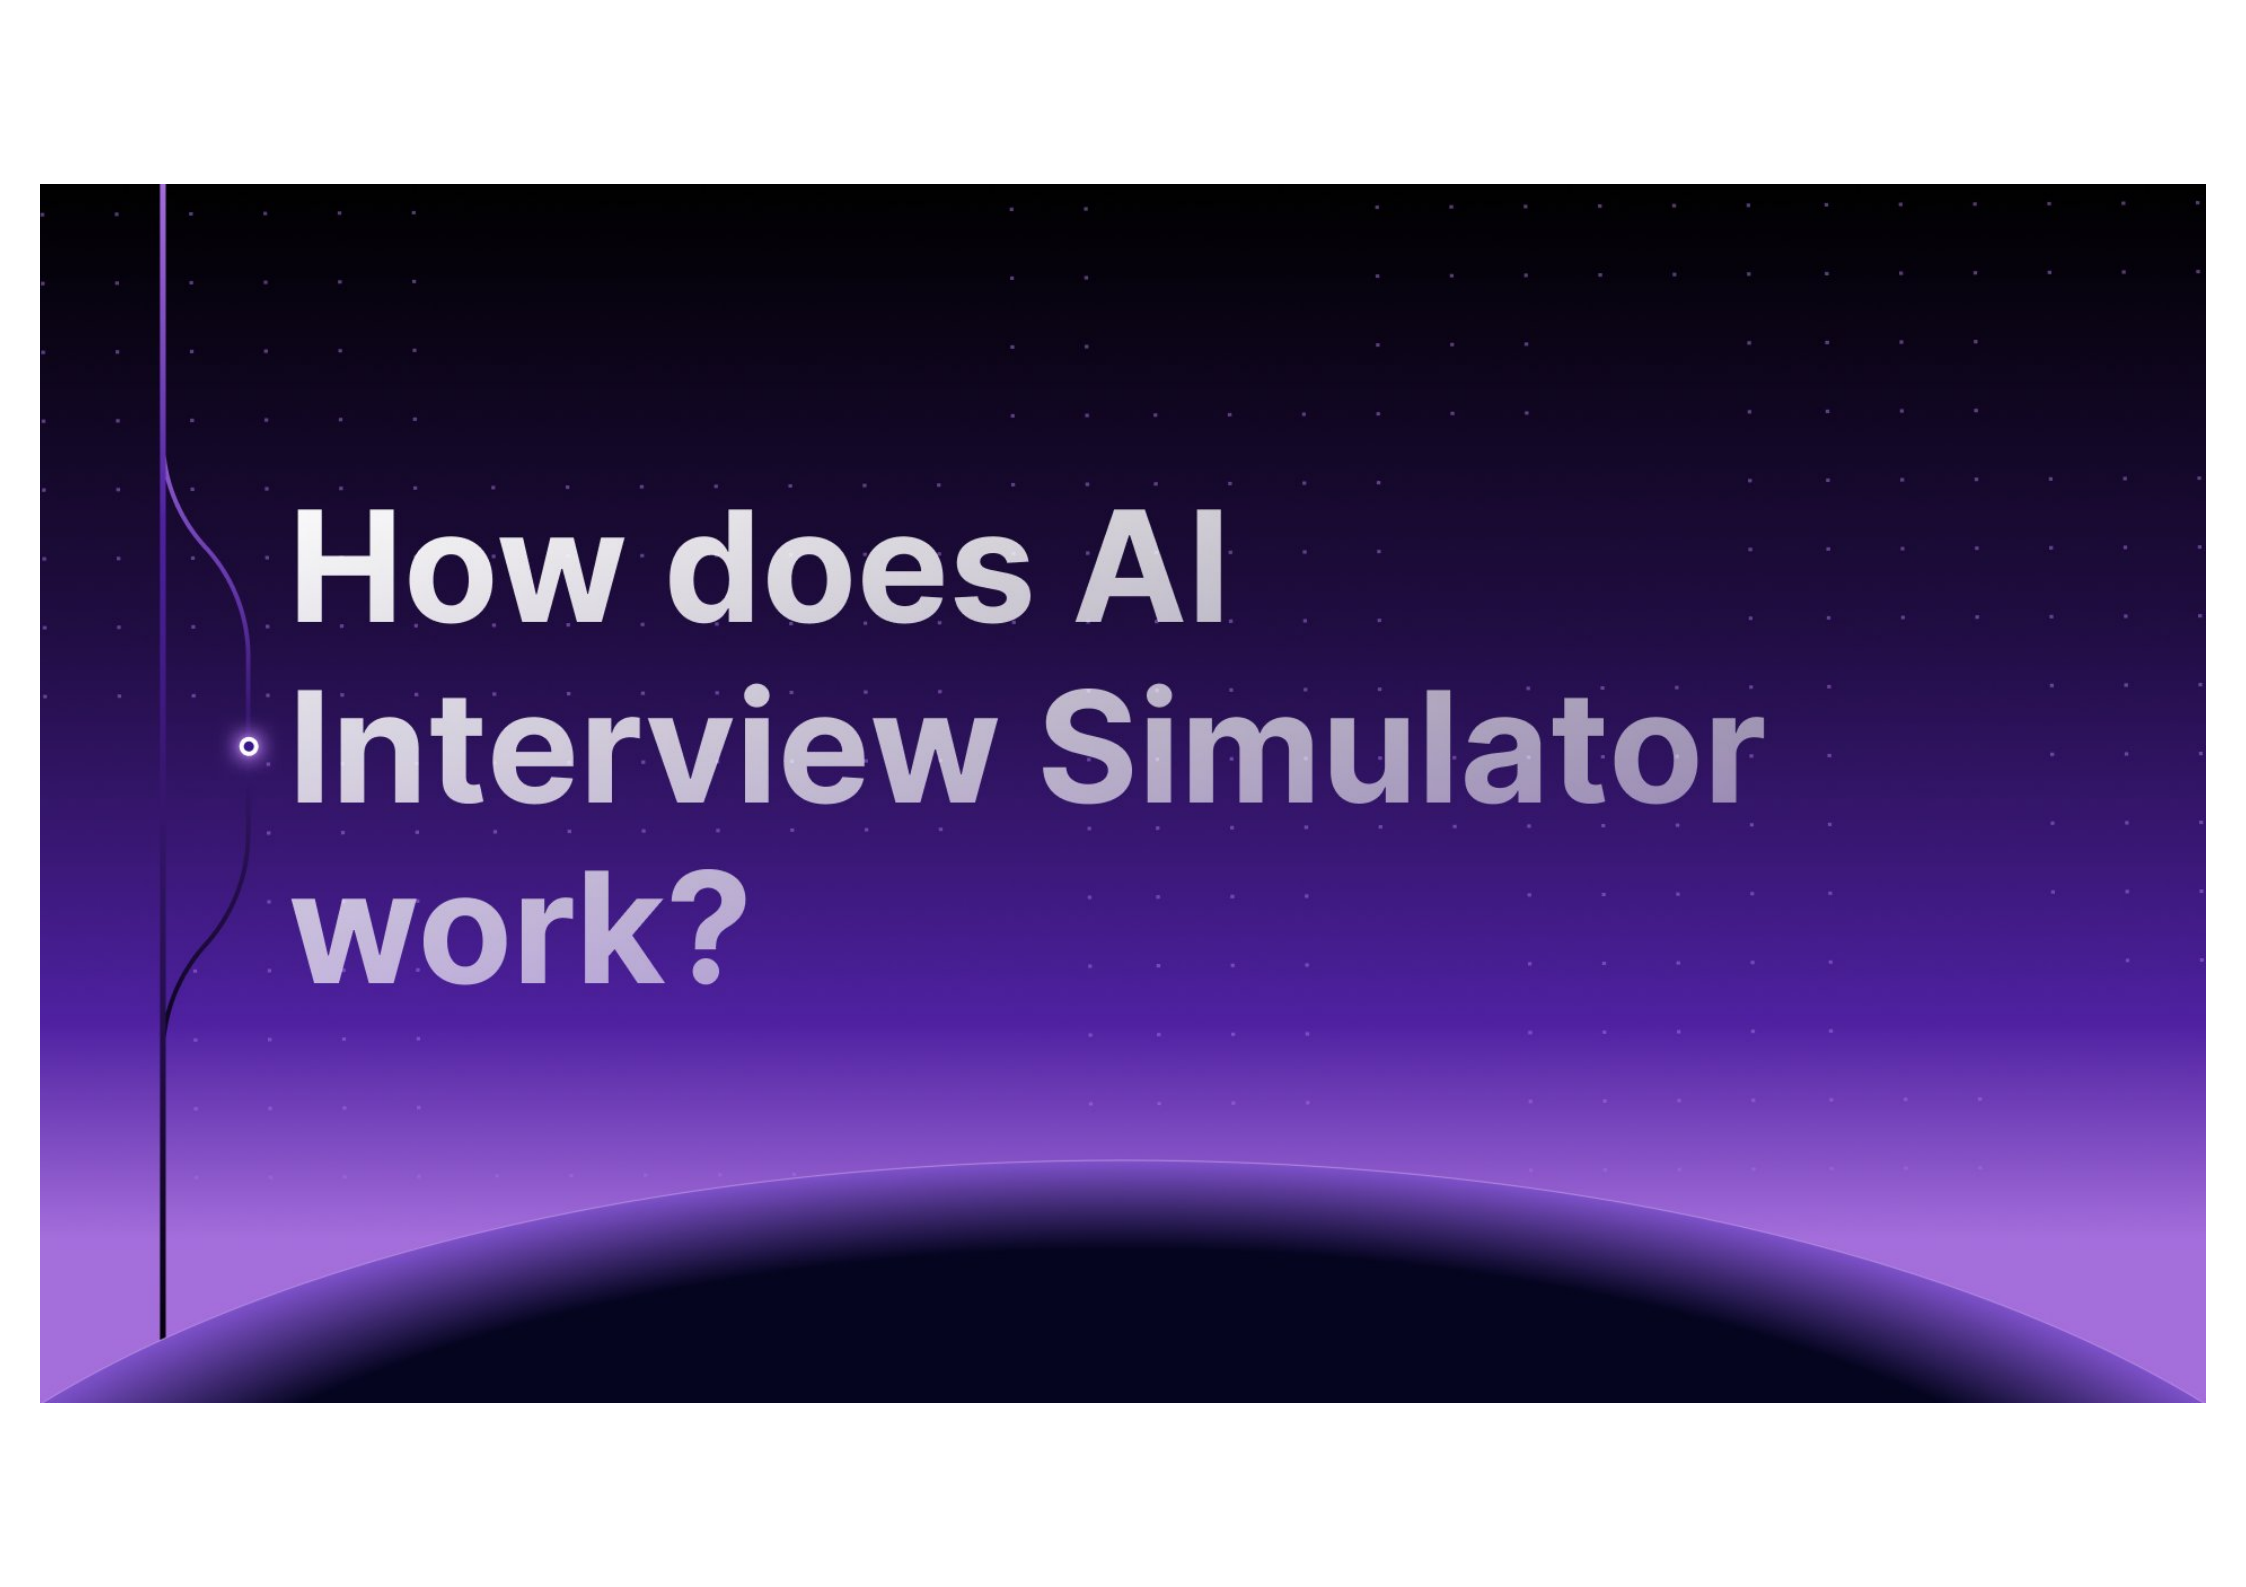

No Clear Weakness Map

Candidates need question-wise evaluation, strengths, weak areas, and actionable next steps.

Our Opportunity

Provide an accessible, structured mock interview with personalized performance feedback.

How does AI Interview Simulator work?

Workflow

The candidate first selects their target role and interview difficulty. Our system then uses AI to generate five questions tailored to those selections. The candidate answers each question one by one, and once the interview is complete, all responses are sent to the AI for evaluation. The AI analyzes the answers and generates a personalized report containing the overall score, question-wise performance, strengths, weak areas, improvement suggestions, and recommended topics to study

Technologies Powering Our AI Interview Simulator

Our tech stack enables a seamless interview experience powered by AI, with real-time evaluation and personalized feedback.

FUTURE SCOPE

Voice-Based Interviews

Enable voice input and speech evaluation.

Advanced Analytics

Track progress over time with detailed insights.

Personalized Learning

Recommend topics and resources based on weak areas.

More Interview Types

Add behavioral, HR, and domain-specific interviews.

Multi-Language Support

Support interviews and feedback in multiple languages.

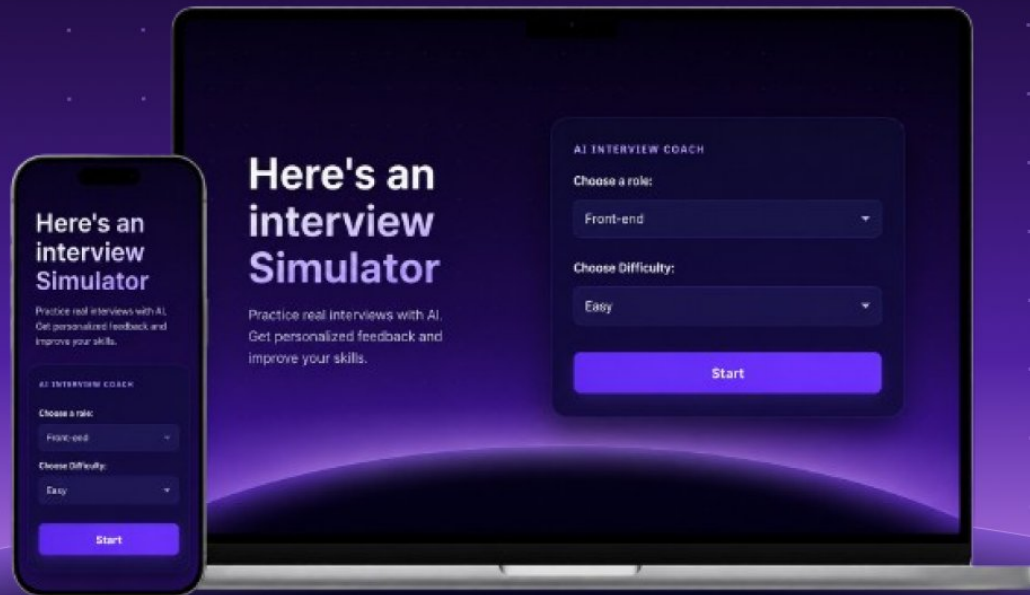

AI Interview Simulator

Powered by AI, Built for the Future

Time for a quick demo

Let's have a look at what we've built so far into our project

Future Scope

Voice-Based Interviews

Enable voice interaction and speech-based responses for a more realistic interview experience.

Advanced Performance Analytics

Track interview performance over time and provide deeper insights into recurring strengths and weak areas.

Personalized Learning

Recommend topics and practice questions based on weaknesses identified in previous interviews.

More Interview Formats

Support HR, behavioral, and domain-specific interviews alongside technical interviews.
